RE: “Walk us through your day and what was it like scoring the game winning goal?”
“[He] was in the airplane and as soon as the plane landed the decision was made with the staff to complete the roster for today’s game, so came from LAX to BMO Stadium.”

RE: “How hectic was it getting back, in terms of getting a flight and taking place on time. Did anything concern you about getting here on time?”
“Slept 10 hours on a 13-hour flight coming here, so everything went super well.”

RE: “How did you start to get to level where you are amped up and was there a part of the game where you knew you had to get into the game?”
“The staff came up with a plan and an option for me to step in for the last 20 minutes to help out the team. I told the staff that if I am available on the roster, I am ready to go and fit to play. My mentality and that’s how we approach every game. I was just ready to go and help the team right away.”

RE: ‘Why did this mean so much and why did you make this journey so quickly to come back and play?’
“My mentality is tough. I have high objectives for myself and the group. We have a fantastic group and that we can do it back to back and we believe that deep down.”

RE: ‘How did it feel to score the winning goal?’
“I felt really good right away as soon as I stepped into the building to see the teammates and the supporters and the whole atmosphere of the game day felt really good right away. Obviously, when I stepped in, I did what he had to do to find that goal that came in the right moment for the team. I am super happy to have that moment for us that makes the goal winning game today.”
