LAFC vs Real Salt Lake

CARLOS VELA
LAFC FROWARD

RE: Offensive struggles

“When you have four games like that (no goals), it is because you are not doing the right things. There are a lot of things you can improve on. On final third, we are making bad decisions. Most of the time we are playing the play that we do not have to play. Sometimes we are also not playing as a team because when you make the right decisions you can see who is in the best position. Right now, I think we are looking for other things and making everything tough for ourselves. When you do that, it is tough to win games.”

RE: Mood in locker room and how things can turn around

“In sports, you always have ups and downs. Today I told the team good teams also lose but they continue to show after a loss. We still have a good team, and we never give up and we have to work to win the next game because it is the more important one. When you change the dynamic and win one game, play good football and score goals, everything looks different. A month ago, we were fighting for multiple tournaments and trophies. When you start to lose trophies, your confidence starts to go down, but we have one last chance to win something, and we have to fight until the end.”
