Re: On hitting the post and crossbar frequently to start the season, and how it feels to get his first two goals of the season.

“First off, I feel really good physically right now. So after hitting the crossbar, I know I’m really really close. So when I came into the second half after hitting the crossbar and I finally scored, it just makes me happy for the whole team.”

Re: On Head Coach Steve Cherundolo saying the team is better when players think more and react less, and how that contributed to the victory.

“We really wanted to start really strong. Really strong and going and going so we can get that first goal in and we can be a bit more calm. But we just kept playing almost without thinking after that first goal. So it felt really good.”

RE: On whether he focuses on the recent negative form in order to change it or if he ignores it and just tries to do his thing

“It actually motivates me even more, not to have scored in so long. But there are many players that can score. I am not the only one doing that. The importance is to take pleasure on the pitch. That motivation is big, as well as to please the family and fans.”
