**RE: Overall thoughts**

“There is games when you have big scoreline and a ton of goals and those are always fun but these ones are great too, the ones you have to grind out, they’re tough. On the road, comes down to the last minute. 10v10- guys need to have a lot of grit in those moments. It feels great to get another win and a very important three points.”

**RE: 100<sup>th</sup> regular season in history and being part of the history**

“It’s huge. How many clubs are in this league now? and to be tied to the fastest to 100 is a huge, monumental step that is something the club should be proud of. I think it is something the ownership and technical staff should be proud of. There’s a lot of blood sweat and tears that goes into this. Huge shout out to everyone that is part of the organization. It’s massive.”

**RE: How they organize when there’s a bunch of defenders on the field**

“There is a base, structure that we have as we are getting these subs. Every time a new sub comes on, he gives us the structure and we are doing. But more so in those moments, it is just time to grind. It is time to react and makes plays. You’re going to get pulled out of position. You’re playing 10v10, they’re going to be throwing a ton of numbers forward so its going to have to be guys reacting and making the right decisions in big moments.”
